

SnapTrade

easy e-Commerce

Price Overview

The scope of our services goes far beyond mere price optimization. You get a comprehensive software solution at fair prices.

With our dynamic graduated prices, we offer you a fair pricing model.

You save money and do not have to commit to a rigid billing model.

General information

How will the costs be billed?

- Monthly at the end of the accounting period
- Dynamic scaling according to sales
- Free usage possible until your contract with the existing repricer expires

Monthly fees are charged on a sliding scale for sales. The number of sales is calculated across all registered marketplaces within the SnapTrade account. Each product (ebay repricing, Amazon repricing, BuyBox-MAX, FBA controller or ShopSPY) is calculated separately.

What are the payment methods?

- SEPA direct debit

At the end of the accounting period, your invoice will be sent to you by email. The invoice amount will then be collected from your business account by SEPA direct debit. You only pay for what you have actually used and you don't have to spend your claim before you have earned it.

How is the number of sales determined?

Your order contains: **2x** articles A and **1x** article B

≈ **Total: 3 sales**

*The accounting is based on the sales achieved in the last 30 days. The sum of the sales positions is used for the classification in the corresponding scale.

Prices

(valid from 01.01.2021)

The current price information on our website applies.

Amazon Repricing

All prices plus VAT at the statutory rate.

Monthly fees:

MONTHLY SALES PER SELLER	3 MONTHS	12 MONTHS
